

CSCI175N : Programming Using C++

Minimum grade of "C" or better required for this course

This course is the first course in C++. The student's problem solving skills will be strengthened while learning C++. The importance of variable data types, arrays, if, if else, loops, and functions will be emphasized. Additionally the student will be introduced to pointers, structures, and selected preprocessor directives.

Class Hours 2

Lab Hours 2 **Credits** 3
