Technology Recommendations

Since many classes have an online component, it is recommended to bring a laptop to class that meets the following standards:

- 8GB RAM minimum 64 bit (16GB for graphical work)
- Intel Core i7/AMD A7 processor or higher
- Wireless networking card for campus
- Solid-state hard drive
- Maximize usb ports
- Windows Operating system 10
- No Windows 10 S (only runs apps purchased at windows store)

Chromebooks (or MAC / PC tablets), are not recommended because they do not have adequate computing power or they have software compatibility issues. **Although it is not required to bring a laptop to all classes, it is a recommendation. Please see your syllabus for specific course requirements.**
